

Kyle Dunphy graduated with distinction from Purdue University with a Bachelor of Science degree in Electrical Engineering Technology. After completing Purdue's co-op student program and working full time for a year and half, he received a fellowship from Delphi Electronics and Safety and is now attending Cornell University to acquire a Master of Engineering degree in Systems Engineering. He currently plays an active role on the Cornell Formula SAE Race Team, maintains the secretary position on the Cornell student chapter of INCOSE, and is the systems engineering field representative on the Cornell Graduate and Professional Student Assembly. While working at Delphi Kyle was a systems engineer on the 2009 model year XM Satellite Radio receiver project for General Motors vehicles. After the completion of his degree, Kyle plans to establishment himself in the systems engineering career field and pursue an engineering management position. In his spare time he enjoys cars, golfing with friends, and learning about the latest technologies.
